Milano

Features

Big news: A high-end, high-definition look—without the high-end cost! Milano is a high-definition ceramic-body product whose elegant travertine visual is created using Clarity Digital Imaging (a first for ceramic). Antique edges and a textured surface complete the upscale look.

- The most sought-after sizes and shapes: 13" x 13", 18" x 18", mosaic, and bullnose
- 3 trend-wise colors

COF (Wet)	0.37

This tile features random variations of shade and texture within each carton. To insure optimum appearance, it is imperative that tiles from various cartons be continually blended during installation. Placement of tiles should be decided on before beginning installation.

*OSHA (Occupational Safety and Health Administration) has established a recognized industry standard of 0.5 (wet and dry) for slip-resistant surfaces. The Americans with Disabilities Act (ADA) recommends, but does not require, "a Static Coefficient of Friction of 0.60 for accessible routes and 0.80 for ramps." ADA does not specifically state that 0.60 is both a dry and a wet requirement. It is important to note that any tile or other hard surface flooring can become slippery when wet or improperly maintained. Products installed in an exterior application must comply with applicable ANSI 108 series of the "American National Standard Specifications for the Installation of Ceramic Tile" and comply with TCA installation methods applicable to installation conditions.

Approved Usage
