## Whistler

Beveled

## **Features**

Whistler brings you the beauties of birch in unique and leading-edge colors they're becoming greyer, blacker, more charcoal.

Birch is especially beautiful in these colors. It's a wood that's extremely popular in the Northwest and on the West Coast. And greys are predicted to catch on quickly in other regions, too.

Whistler features the elegantly casual look of hand-scraped, hand-rubbed wood with a matte, non-glossy finish. The subtle hand-planing is unique and never duplicated or patterned, and the beveled edges are softly rounded rather than angular. The hand-rubbing is so fine, it creates an undulating, feathered effect.

It's treated with Shaw's own ScufResist™PLATINUM, the ultimate in scuffresistant finishes. While all woods will scratch or dent, this superb finish resists the ordinary marks of daily wear. It makes a floor easy to live with ... and on.

And because Whistler is engineered, it offers numerous benefits:

- Can be installed on, above, or below grade in a nail, staple, glue-down, or floating installation method
- Made in the USA in Shaw's state-of-the-art hardwood manufacturing

In addition, Shaw buys from suppliers who practice managed forestry techniques.
